

Kolodka

Heat management device operation manual

Kolodka

With the Kolodka heat management device, you can take over the temperature control, smoking your hookah longer and softer.

Kolodka

- Original design.
- Intelligent design that prevents fragments of coal from falling into the cup.
- High heat capacity.
- Special ebonite handle, eliminating the possibility of getting burnt.

Operating tips

- Kolodka is designed so that you don't have to be afraid to feel hookah by touch! The entire bottom surface of Kolodka should be in tight contact with tobacco or a non-tobacco mixture.
- If the tobacco or mixture burns, you can soak the HMD in hot water for 1 hour and then easily clean the bottom surface.
- Do not leave the appliance in water for more than 2 hours, as this could lead to oxidation of the HMD's duralic cup.
- After washing the appliance it is best to wipe it dry.

PLEASE NOTE!

- Do not use detergents in the care of Kolodka, and don't cleaning it in the dishwasher.
- To avoid deformation, do not heat the HMD on a hot cooktop.

For your information:

Dural and aluminium has a high thermal conductivity but oxidises quickly even in normal water. Most dishwashing detergents destroy the natural oxide film that prevents oxidation of the metal, so you should not use them! This alloy has a melting point of 600°C, which is why you should not heat it on a cooktop.

Warranty

- The warranty period is 1 year.
- To submit a warranty claim, contact the technical support at mattpear.co or email support@mattpear.co.
- The warranty period starts from the date of purchasing the product only if the seller has filled in the relevant fields of the warranty certificate.
